## The mysterious world of stereograms.

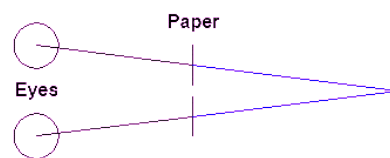

The picture on the left is a "stereogram".

stereo = two  
gram = pictures

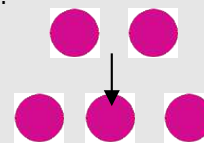

Stereograms look just like patterns, but hide 3D pictures. You can see the 3D pictures with a little practice.

### How do you see them?

To see an stereogram, you need to look through the paper.

Rest your eyes, so the two dots become three dots:

You should see a 3D image appear.  
Good luck!
